Videology Photo ID Cameras

Excellence. Every day. Every time.

Professional Photo ID Camera for Identification Applications

Videology Photo ID Cameras deliver consistent, high-quality facial imaging for identification and credentialing applications.

Designed for ID cards, access credentials and enrollment systems, they combine reliable image capture, simple USB connectivity and seamless software integration.

Built for ID and Credentialing

- Capture Full HD facial images for identification and credentialing.
- Support employee badging, visitor management and enrollment applications.
- Integrate with compatible badging software through TWAIN.
- Deliver reliable performance in high-volume credentialing environments.

Simple Setup and Consistent Capture

- Automatic flash synchronization for consistent image capture.
- Auto-exposure maintains accurate facial brightness.
- Adjustable flash intensity accommodates different environments.
- Single USB connection for power, data transfer and flash control.

Videology Photo ID Camera Highlights

- Full HD 1920 × 1080 image capture
- Adjustable synchronized LED flash
- Single USB connection for power, control and image transfer
- UVC and TWAIN software compatibility
- Available as camera-only or complete desktop system
