

Videology®

Industrial-Grade Cameras

an inTEST Company

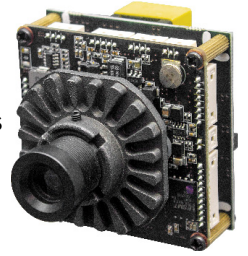

Custom Embedded Industrial-Grade Cameras

Excellence. Every day. Every time.

Videology is not just another off the shelf company

In October 2021, Videology was acquired by inTEST Corporation and currently is a part of the Process Technologies Division.

Today, Videology leverages our technology expertise, skilled talent and high-tech locations to provide clients our unique brand commitment: **Excellence. Every day. Every time.**

- Our global headquarters are near Boston, MA.
- Engineered on the High Tech Campus in Eindhoven, the Netherlands
- Assembled in Boston and also in Eindhoven by the best people in the industry
- Value-added manufacturing services, from subassemblies to total box-builds

Videology designs and builds to your bespoke specification or modify an existing design

Technical Leadership

- CMOS sensors with DSP & CPLD components
- Wide range of custom MP resolutions
- USB 3.0, IP, EX-SDI, MIPI & more options
- Multiple output options: 10/100/1000Mbps RJ45
- Full SDKs for custom integration & data management. ex. Linux, C++, Python, & more
- Experts in video compression saving space & time
- SCAiLX SoM fully integrated by Videology

Additional services and solutions include:

- Base band video
- RF transmission
- Twisted pair
- Power supply engineering
- EMI suppression
- SCAiLX AI integration

The Science Behind the Camera

At Videology, we have a deep knowledge base of photonics, optics, and spectroscopy.

Private Labeling & Packaging

We also private label and package with a client's company name and logo, effectively maximizing market presence.

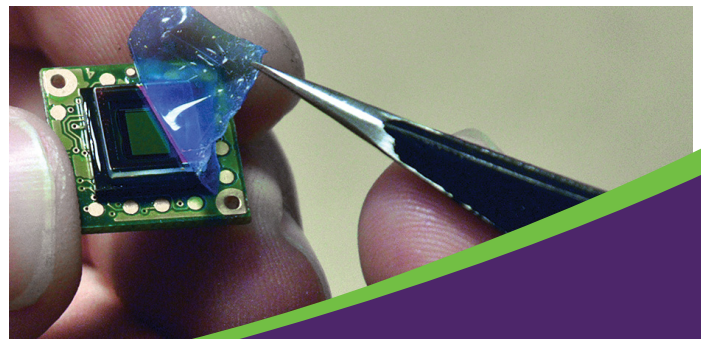

Evaluation and Testing

Our fully-equipped laboratories measure and test every aspect of camera imaging and software functionality during and after manufacturing.

Honored to be an OEM Top Supplier

We are a leading supplier to global OEMs for embedded camera systems and maintain "Certified Supplier" status from F500 firms, primes and other large volume companies in the photonics industry.

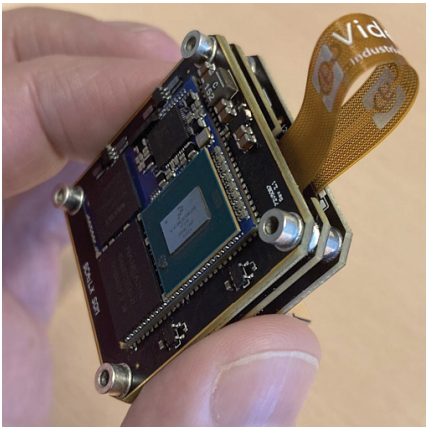

Over 25 years of excellence in custom embedded cameras

Since 1995, Videology has been a global leader in the design and manufacturing of industrial-grade embedded video cameras.

We are the trusted photonics hardware and software partner inside our clients' products.

Now including our exclusive AI on the Edge Platform- **SCAiLX!**

Our custom embedded cameras are used in a wide spectrum of applications

- Biomedical Devices
- Mass Transit
- ATM/Kiosk/Banking
- Pipe Inspection
- Drones & ROVs
- Life Sciences
- Aerospace
- Photo ID
- 3D Printing
- & many more!

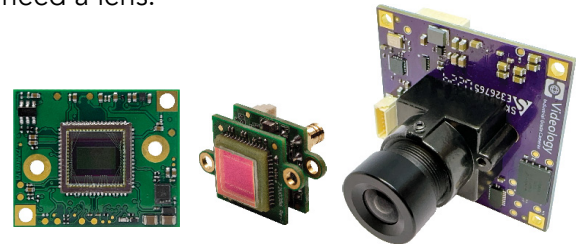

Videology's specialty is meeting the high volume and challenging requirements of OEMs and large-scale integrators.

We excel in integrating industry-proven CMOS sensors, interfaces, and cutting-edge design.

Our cameras have been embedded into systems across the globe and interact with millions of people on a daily basis.

Board Level Cameras - Our Specialty

Giving you the freedom to select quality optics and ideal for applications that do not need a lens.

Zoom Block Cameras - Our Strong Base

We have revolutionized designs with an ability to auto focus at an infinite number of positions in a very small package.

Photo ID Cameras - Our Heritage

Professional-grade, designed for the long-term and are ideal for access control. Simple, effective, and easy to use.

Over 25 years of excellence in custom embedded cameras

Our Brand Difference

Our deep commitment to the customer experience delivers performance excellence throughout the entire customer journey. This is Videology's brand difference and it's our company's most important priority in serving the needs of our customers across the globe.

Our Brand Promise

How do we support our brand difference? We do so with a sincere promise we make to every Videology customer as follows: We provide competence, attention to detail and personal care – all with a level of excellence that will delight every customer in every interaction. This is Videology's brand promise and it's been the key to our growth and success – from a small start-up more than 25 years ago to a global leader in today's imaging industry.
